

HURRICANE Season is Here

Emergency Management Team

For the safety of our associates and company, an Emergency Management Team is in place. If a hurricane watch or warning is announced, you will be notified in ample time via e-mail alert and the Alert System. The alert will also be recorded on Emergency Status Hotline.

Alert System

As a reminder, the Alert System will send emails and text messages to all associate's personal and business email or personal phone number on file. It is extremely important for you to stay informed, so please opt-in if you haven't already. The opt-in process takes less than two minutes.

Emergency Status Hotline

The Emergency Status Hotline is another source to receive information in the event of a hurricane. The number is on a sticker, conveniently located on the back of your badge.

It is also recommended to add this number to your mobile device so it is easily accessible. When you call this number, you will receive instructions regarding emergency procedures in the event that the South Florida area is under a hurricane watch, hurricane warning, or other emergencies.

Please make note of the hotline telephone number:

1- 800-433-XXXX

The message will be updated periodically.

Be Prepared

Please start thinking about hurricane preparedness by making sure you, as well as your department, have an updated emergency contact list, including all associate's names and phone numbers. In addition, we encourage everyone to prepare themselves at home.

For your convenience, please see the link below for the reference website to assist you with any questions you may have on how to prepare for a hurricane.
